x4

Datapath x4 and x4-1U display wall controllers

The Datapath x4 display wall controller offers a flexible low cost way of building inspiring display walls – from creative to complex, landscape or portrait and using unlimited number of displays. It's innovative thinking and a commitment to keep things simple that ensures the Datapath x4 display wall controller is easy to configure, totally flexible and full of creative potential.

Datapath x4 key features

- Infinite creative configurations
- Up to Quad HD, 4 HD outputs
- Rotates, crops, scales, mirror and bezel corrects
- Unlimited preset and templates
- Accepts Dual-Link DVI, Single-Link DVI or HDMI inputs
- Power down configuration save facility, power up instantly with no re-set up required

Datapath x4-1U key features

- The same features as the x4 but contained in a rack mountable chassis
- Datapath x4-1U has an "Output Framelock" button to setup the unit with all four outputs set to exactly the same timings, providing smooth and clear video

Supporting creative monitor arrangements

Build dynamic video walls, small or large with the Datapath x4 and the Datapath dL8. These products have been designed and developed to allow the user to utilise their creative imagination to design display solutions for digital signage applications and video walls.

By combining these products you can take advantage of a system that delivers unlimited creative possibilities at a low cost, supporting up to 32 screens or more with multiple dL8 units.
